Anvil Studio Tutorial

Easing eye strain

If you are using a high-resolution display and everything on the screen seems to small to read easily, try this

1. select **View / Options**,
2. select the **General** tab
3. press the **Font** button
4. change the **Size** field to 10, 11, or some other value
5. if you don't like the results, press the Font button again and try a different size
